Vanpoules oil candles offer a simple and economic alternative to the traditional wax candle and are especially useful where draughts cause a problem or for use as an acolytes candle.

They are low maintenance, there is no dripping wax and yet the symbolism of the flame is maintained. Used in conjunction with Vanpoules Candle & Lamp Oil, these candles burn virtually smoke and odour free and the fibre wicks supplied with each should never need replacing. All nylon oil candles are made to order.

Oil is poured directly into the integral 'oil reservoir' in the top of each nylon candle, so no additional separate interior oil cartridge is required.

Shouldering

To allow the nylon oil candles to be used with your existing candle sockets, we offer a shouldering service to ensure a good fit.

When requesting shouldering please provide the following information:

1. An accurate measurement of the INTERNAL diameter of the candle socket.
2. An accurate measurement of the INTERNAL depth of the candle socket, remembering to allow for any protruberance, such as any nut, screw or thread that may be proud of the base of the socket.

We can also adapt nylon oil candles to fit over spikes in required. Please provide base diameter and length of spike for this service.
